uPVC Doors & Windows

uPVC profiles used by our company are manufactured in India and are BIS certified. They are tested and approved by

Wind load resistant

Energy efficient

Sound insulation

Sensible Green

Self extinguishing

Weather Resistant

UV resistant

Termite Proof

Strong and Secure

The uPVC profiles used by us are approved by most of the State and Central Government Departments. Our profiles match the R1 / R2 / R3 / R4 / specifications as per DSR 2023 and have been widely used by Railways, AAI, IOCL and various other Govt. Departments.

CPWD Approvals:

a) ADG, Region Hyderabad b) SDG, Region, Chennai

MES Approval:

a) ADG (Projects) Chennai b) ADG (Projects) Hyderabad

Railway Approval:

a) South Central Railway – Secunderabad

Approved by AP state Schedule of Rates

uPVC Doors & Windows

Our Prestigious Projects in State and Central Government departments

Central Public Works Department (CPWD)

- ESIC Hospital & Quarters, Kakinada
- ESIC Hospital & Quarters, Rajamahendravaram
- National Centre for Disease Control, AP branch
- Renovation in University of Hyderabad – Gachibowli
- Income tax office renovation, Vijayawada
- Radar station renovation, Machilipatnam

Military Engineering Services

- Quarter renovation at Dolphin Hills, Visakhapatnam
- 14 floor tower (2 towers) renovation at 104 area, Visakhapatnam
- 9 floor tower (2 towers) renovation at Naval Coastal Battery, RK beach, Visakhapatnam
- 11 floor tower renovation, Nausena Bhag, Visakhapatnam
- Naval sports stadium, Satavahana, Visakhapatnam
- Meghadripeta Defence Housing Colony (6 blocks), Visakhapatnam

South Central Railway

- Windows for Signalling Huts construction for every 10 kms along Vijayawada – Visakhapatnam railway line
- Khajipet railway station running room
- Guntakal railway station renovation

Power Grid Corporation

- Quarter renovation at Ghatkesar, Telangana

Airport Authority of India

- Gannavaram Airport

Andhra Pradesh Panchayat Raj & Rural Development

- APPRD Head office, Vijayawada

Andhra Pradesh Medical and Infrastructure Development

- New Govt Hospital, Casualty block, Vijayawada
- Siddhartha Medical College, Class room & labs, Vijayawada
- Old Govt Hospital, Ayush Dept, Vijayawada

Andhra Pradesh State Finance Corporation

- APSFC Office, Ongole / Eluru / Kakinada

uPVC Doors & Windows

Our Prestigious Projects in State and Central Government departments

Andhra Pradesh Tourism Corporation

- APTDC, Haritha Resorts - Rampachodavam
- Coringa Bird Sanctuary, Kakinada
- Thotla Konda beach resort, Visakhapatnam
- NTR beach development, Kakinada
- Berm Park, Haritha Resorts & Cottages – Vijayawada
- Haritha Resort, Gandikota, Anantapur

- Kakinada smart city project under which 25 municipal schools have been renovated
- Collectorate building, Mulugu, Warangal District

Telangana State Police Housing Corporation

- Police training centre (Hanumakonda)
- Forensic Lab (Warangal)
- Forest College and Research Institute, Mulugu

Andhra Pradesh Police Housing Corporation

- Model Police station: Avinigadda, Kaikaluru, Mylavaram
- Veterinary College Lab, Gannavaram
- Animal Breeding Centre, LAM Farm, Guntur

In addition to this, we have supplied to a number of Architect firms and Builders

1. Alien Properties, Hyderabad
2. Praneeth Valley, Hyderabad
3. Urban Villas, Hyderabad
4. AVS Constructions, Vijayawada
5. PRECA Solutions India Pvt Ltd, Vijayawada
6. ARK CONCEPTS, Vijayawada

Color options in UPVC

uPVC Doors & Windows

Sliding Window

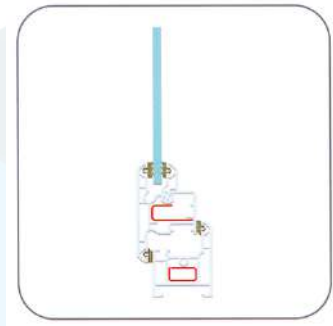

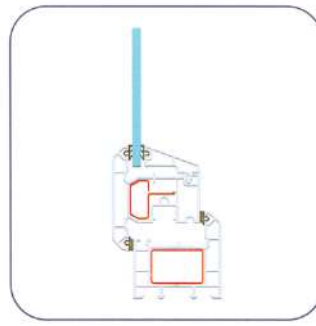

Sliding Door

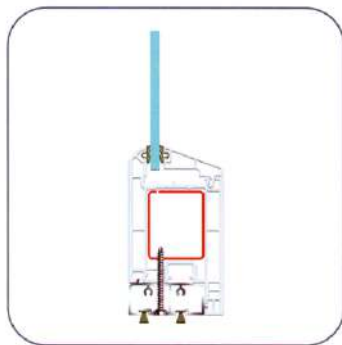

Sliding doors & windows are constructed with high quality uPVC profiles (2.3 to 3 mm wall thickness) reinforced with galvanized steel for enhanced durability. They feature double or triple glazing options, offering superior thermal insulation with U-values as low as 1.3 W/m²K. These doors & Windows provide effective noise reduction up to 40 DB and are engineered to withstand wind pressures up to 3000 Pascal, (equivalent to a speed of 245 km per hour making them ideal for high-rise applications. The doors include a multi-point locking system for increased security and EPDM gaskets for excellent weather sealing. The Doors & Windows are customizable in various colors and sizes

uPVC Doors & Windows

Casement Window

Casement Door

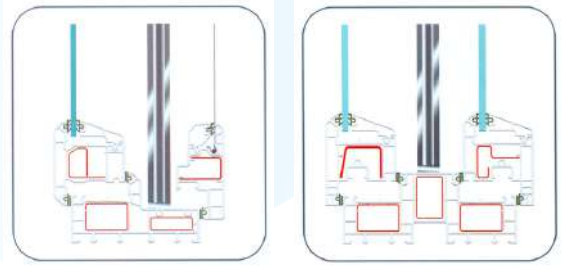

Casement doors and windows are built with high-quality uPVC profiles reinforced with galvanized steel for added strength. They have 10 mm overlap for enhanced performance. They feature double or triple glazing options, providing excellent thermal insulation. Our window profiles have built-in hardware location facility for hinges and strikers. Designed for superior weather resistance, they include EPDM gaskets to prevent air and water infiltration. These Doors & Windows are fitted with multi-point locking systems for enhanced security and smooth operation, utilizing precision engineered hinges. With customizable sizes & colors, they offer versatility in design while ensuring noise reduction up to 40 dB and high durability against environmental elements. Ideal for modern and traditional architecture.

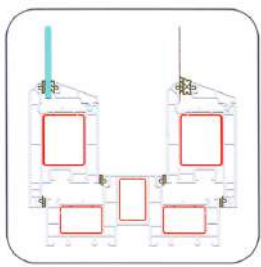

uPVC Doors & Windows

Twin Sash window

Twin Sash Door

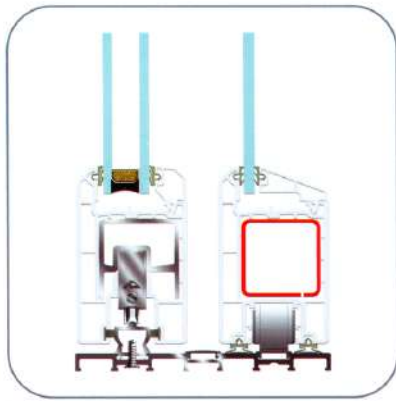

Twin sash doors and windows feature dual sashes for increased ventilation and style. We can provide both inward and outward shutters with glasses for very low noise applications. In the other configuration, the outward shutter is a glass shutter and inward shutter is a mosquito shutter. There is a facility to incorporate security grill, on the outer frames in between the two shutters, for security and privacy. Enhanced security is provided through multi-point locking systems, while customizable designs ensure both functionality and aesthetic appeal.

uPVC Doors & Windows

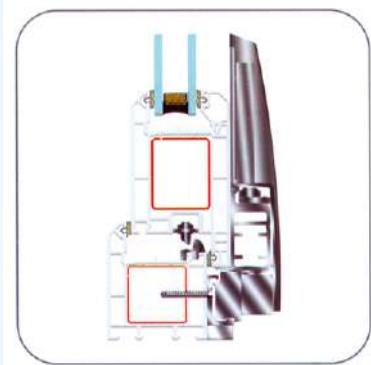

Lift and Slide Door

The lift-and-slide mechanism allows the door panels to lift slightly off the track before sliding, reducing friction and enabling effortless movement. These doors typically feature large glass panels, maximizing natural light and providing unobstructed view of the outdoors

Fold and Slide Door

These doors have fold in sections and slide to one side, creating a wide, unobstructed opening that seamlessly connects indoor and outdoor spaces. Heavy duty tandem rollers make the folding mechanism typically smooth and effortless, making the doors simple to use even for large openings.

uPVC Doors & Windows

Vertical Sliding Window

This window has become a perfect solution where the opening aperture is taller than width. They slide vertically, which means they don't require additional space to open, making them ideal for areas with limited external space. The spiral balance technology used can hold the sash in any position

Parallel Window

Parallel Windows are designed for maximum ventilation and ideal for staircases, landings and offices. With a maximum sash size of 2 meters wide and 2 meters tall, it caters for large openings, giving plenty of light to the area. The window does not obstruct outdoor spaces, making it ideal for areas where space is limited

uPVC Doors & Windows

Tilt and Turn Window

This provides an European window design option for customers. The windows can tilt inward at the top for secure, controlled ventilation, or open fully inward like a door for maximum airflow and easy cleaning. The tilt function reduces the risk of falls, especially in homes with children or pets. The tilt function also reduces the risk of damage in strong winds, making them a reliable choice for such environments. The inward-opening design does not obstruct outdoor spaces, making them ideal for areas where external space is limited.

Heavy Patio Door

Robust design with reinforced frames, providing enhanced security, smooth operation, and expansive views, ideal for large openings

Aluminum Series

Wide range of Aluminum series

Aluminum Doors & Windows

CASEMENT DOOR / Window

The 53 series Aluminium Casement Doors & windows combine strength with elegance, featuring a robust yet slim frame that enhances any architectural style. They open outward / inwards allowing maximum ventilation and unobstructed views. They are energy-efficient, with excellent thermal and acoustic insulation, making them ideal for both residential and commercial applications. The Doors and Windows are also resistant to corrosion and weathering, ensuring long-lasting performance with minimal maintenance. These doors can be used for aperture sizes of width up to 1000 mm and height up to 3000 mm for single shutter.

SLIDING DOOR / Window

The 70 series Aluminum sliding doors / Windows are durable and sleek, offering a modern design with slim profiles that maximize natural light. They provide smooth sliding operation, excellent thermal insulation, and are resistant to corrosion. Ideal for residential and commercial spaces, these doors are low-maintenance and can be customized to fit various openings. These doors can be used for maximum aperture sizes of Width up to 3000 mm and height up to 3000 mm.

Aluminum Doors & Windows

POCKET SLIDING DOOR

Space-saving design slides discreetly into the wall (or pockets on the side of the unit). They are ideal for use in the rooms that are normally kept open but sometimes need to be hidden. Such systems are very important when clearance limits the use of swinging or pivot doors and wall space doesn't allow for sliding doors

PERFECTION SLIDE DOOR

Elegant and minimal design obtained by reducing the visible profile (visible shutter frame and central node is only 20 mm) to the minimum possible. Possibility of creating large doors with apertures sizes of Width up to 5800 mm and height up to 4500 mm. The continuous research in the design of the components has led to an important innovation with regards to the adjustable handling carriages, with parallel wheels, which can now support loads up to 500 Kg for each shutter.

Aluminum Doors & Windows

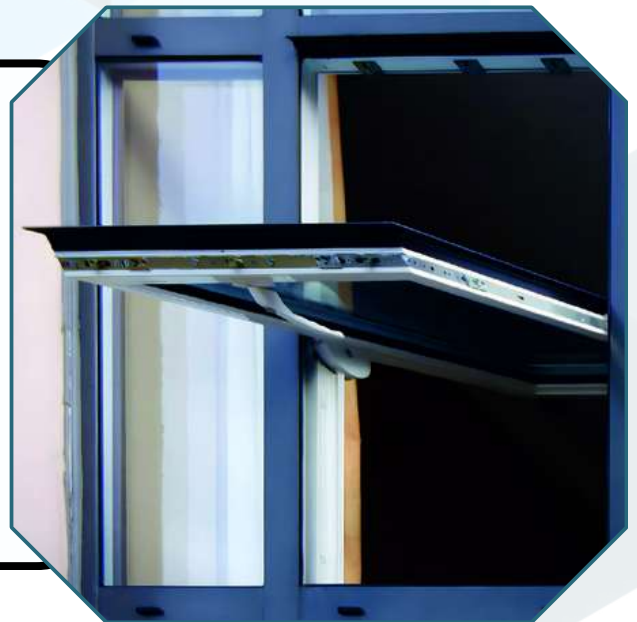

VERTICAL SLIDING WINDOW

This window has become a perfect solution where the opening aperture is taller than width i.e. reference golden ratio 1:1.618. They slide vertically, which means they don't require additional space to open, making them ideal for areas with limited external space. The spiral balance technology, with a maximum load capacity of 13.5 kg per sash, can hold the sash in any position. The maximum aperture sizes are Width 1200 mm and Height 1800 mm

PIVOT WINDOW

Aluminium pivot windows offer a unique, modern design with a central pivot point that allows the window to rotate horizontally or vertically up to 180°. This innovative operation provides excellent ventilation, natural light and easy cleaning from inside. The maximum aperture sizes of Pivot Windows are Width 1600 mm and Height 2100 mm with a maximum sash load of 120 kg.

Aluminum Doors & Windows

PARALLEL WINDOW

Our Parallel windows are designed to move inward or outward with the limited opening, allowing no access through the window. As a result, the advantages of a circulating and safe ventilation function are combined with an increased ventilation cross section in the projecting element. This system is mainly designed for free air flow and for regulating temperature. Parallel windows are designed to perform against heavy storms, especially when living in areas exposed to heavy wind, rain and saline air. These doors can be used for maximum aperture sizes of Width up to 1200 mm and height up to 2100 mm.

TILT & TURN WINDOW

The windows can tilt inward at the top for secure & draft free ventilation, or open fully inward like a door for maximum airflow and easy cleaning. The tilt function reduces the risk of falls, especially in homes with children or pets. The inward-opening design does not obstruct outdoor spaces, making them ideal for areas where external space is limited. These doors can be used for aperture sizes of width up to 1000 mm and height up to 3000 mm for single shutter.

Aluminum Doors & Windows

SLIDING TELESCOPIC SYSTEM

This system is a space saving entrance solution (used for internal purpose only) that consists of multiple panels that stack together when opened, reducing the required clearance space. This design maximizes available floor area while offering efficient access control. It's ideal for locations with limited space such as commercial buildings and interior partitions.

SYNCHRONIZED SLIDING SYSTEM

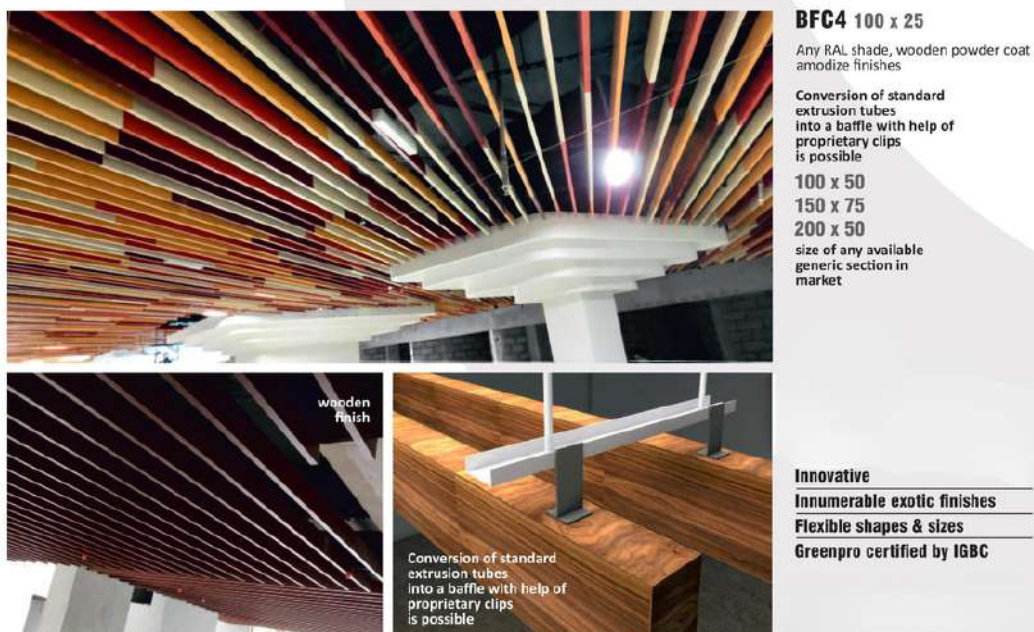

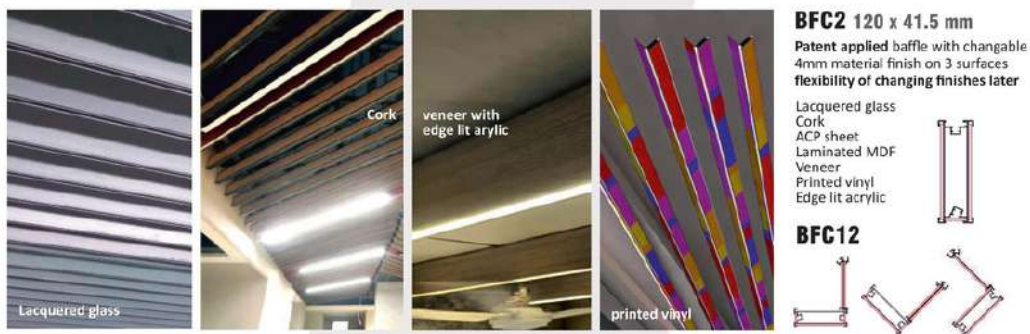

This synchro sliding system is an advanced mechanism for sliding doors and panels. It ensures synchronized movement of multiple sections, allowing them to open and close smoothly in a coordinated manner. This system is commonly used in large sliding doors and partitions offering precision, reliability and seamless user experience.

ALL OUR ALUMINUM DOORS & WINDOWS PROVIDE THE MAXIMUM RANGE OF COLORS - MATCHED PERFECTLY TO THE INTENDED DESIGN

Modular Baffle system

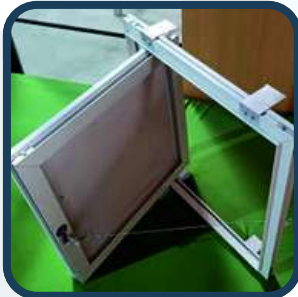

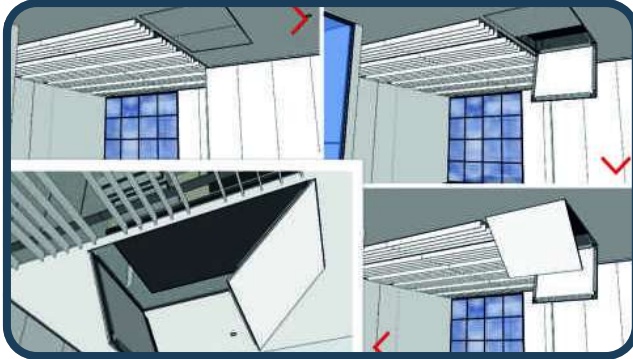

Our baffle ceilings are modular ceiling systems that use linear baffles to enhance the acoustics and aesthetics of a space. The baffles are lightweight, durable, and easy to install, making them ideal for various applications, such as offices, airports, retail stores, and public buildings. They effectively control sound reverberation, create visual appeal, and can integrate with lighting and other ceiling elements.

Aluminum Interior Products

CEILING TRAP DOOR

- Patented design
- Custom sizes (even up to 10 ft)
- Light weight
- Strong shutters don't warp
- Only thin visible groove
- Any infill material
(Gypsum / MR Board / ACP / Laminate,
Veneer on WPC) of 12 mm thick

DRY WALL CLADDING

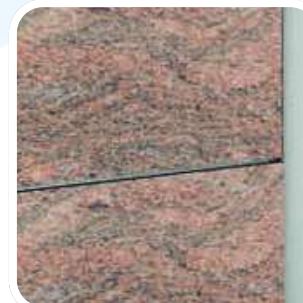

Dry wall cladding system can clad stone, tiles pasted on a board, cement board.. on existing surface

Dry wall cladding along with our open frame structure system can create partition walls for dry or wet areas

- Easy to access services like plumbing etc by removing & refixing panels
- Dry & modular construction makes it very fast to install, relocate & modify

Can be used for

- Wet areas like Toilets & pantry blocks in Hospitals / Hotels.
- Residence / Office wet area blocks

Modular glass partitions

GP 18100 S / D / V - 22 X 100 mm

This system can accommodate 10 to 12 mm thick glasses. This is a revolutionary ultra slim modular glass partition where a single system is designed to accommodate multiple glazing options. The system can accommodate single glass, double glass (even 3 glasses) and DGU glass (18 to 24 mm). The main advantage is that the glass panels configuration can be changed even after installation. This model is STC 54 certified which makes it ideal for dense office use where sound insulated cabins and spaces are required. GP 18100 is very easy to install and can be integrated with other systems like door frame (DF 01) , Glass door (GD 01 / GD 02) , Demountable partition system (WP 01P) and many more.

GP 2160 S / D / V - 21 X 60 mm

This system can accommodate 10 to 12 mm thick glasses. This is an optimized version of the revolutionary GP 18100 glass partition system. This system can also accommodate single glass, double glass (even 3 glasses) and DGU glass (18 to 24 mm). The main advantage is that the glass panels configuration can be changed even after installation. This model is STC 54 certified which makes it ideal for dense office use where sound insulated cabins and spaces are required

GPC 2060 - 20 X 60 mm

This system can accommodate 8 mm thick glasses. GPC 2060 system can be used as a conventional single frame partition. In addition, with edge profile of just 20 mm, this partition system can be used to make grid patterns of any size. We can also make the partition in dual colour tone – Main section will be in one colour and the moulding beads shall be in the second colour

Aluminum Interior Products

Modular Glass Stile Doors

GD 01

lock stile 145 x 40 mm
hinge stile 85 x 40 mm
rail 80 x 40 mm

Integrated handle

Single glass 8 - 10 mm

Glass pane can be changed without demounting door

Unique and smart design

Can be made into a sliding door

GD 02

lock & hinge stile 75 x 40 mm
rail 80/90 x 40 mm

Single glass 8-10 mm

Glass pane can be changed without demounting door

Gasket options on leading edge and stile face

Can be made into a sliding door

Can have concealed door closer

GD 03

lock & hinge stile 26 x 40 mm
rail 60 x 40 mm

Single glass 8-10 mm

Ultra slim design

Very strong construction & joinery

Can be made into a sliding door and sliding partition

Modular Door Frames

DF 01

34 x 50 mm
(11 mm rebate)

Can be used for glass, solid partitions as well as masonry

Strong sturdy construction

Accommodates any door upto 45 mm

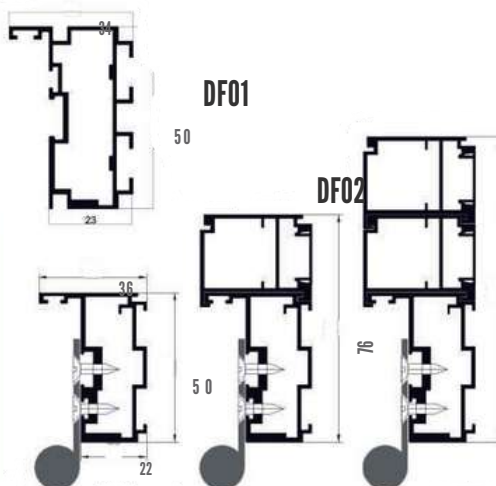

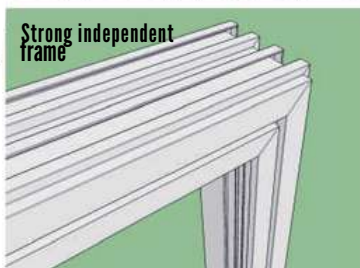

Double acoustic seal provision for High sound insulation

DF 02

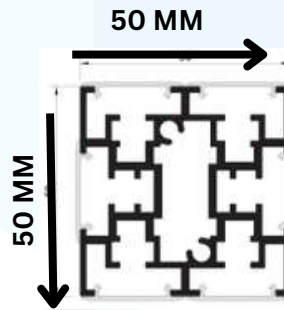

36 x 50, 76, 102 ... mm
(14 mm rebate)

Can be used for glass, solid partitions as well as masonry

Modular extension in multiple of 26 mm can be used for glass, solid partitions as well as masonry

Modular Frame structure

Highly modular construction
Quick install & uninstall
Strong sturdy modular joinery with minimum tools
Complete reusable, relocatable, modifiable
Good load bearing strength to mount accessories like fans, ACs, racks, partitions, doors etc....

CAN BE USED in

Industries & sheds (PEB)

- for office cabins, stores etc

Malls , Airports, Railway stations, Metro stations,

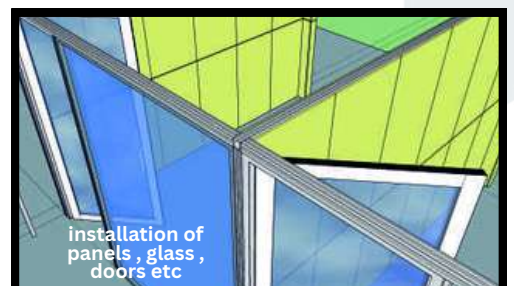

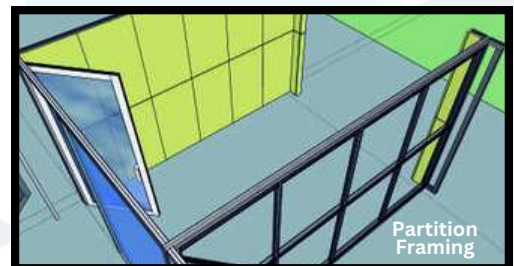

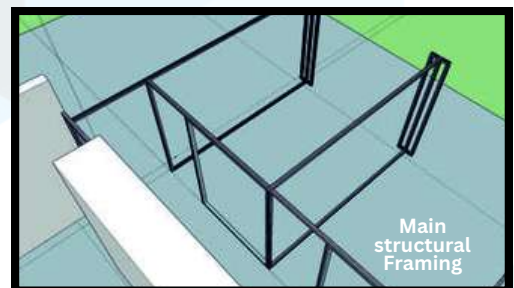

- for kiosks, Retail outlets

Exhibitions

- Stalls & Booths

OFFICES

- for office booths, floating conference rooms, even complete offices

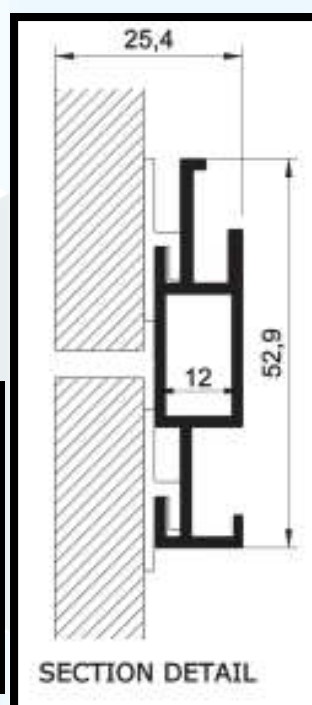

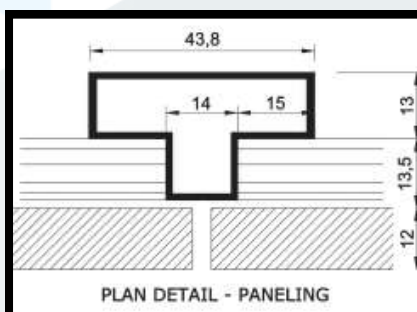

Demountable wall partition system

- Post & rail with panels
- Modular construction
- Very fast installation
- Continuous cavity for conduits, other services acoustic insulation
- Panels can be removed & re-fixed anytime to allow maintenance, can be changed in finish easily
- Panels of 6 mm to 25 mm of any finish can be installed by user-Prelaminated / Post-lam board / Veneer Boards / lacquered glass / soft board / cork board, HPL etc...

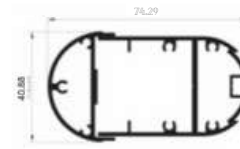

Demountable wall paneling system

- Post & panel framing
- Removable panels fixed with hooks, making maintenance easy
- Doubling it can create partition as well

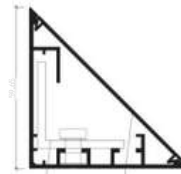

Aluminum Interior Products

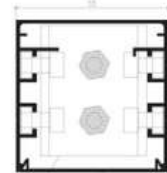

Work station understructure

WSL01 tapered leg
75/45 x 40 mm

WSLT60
triangular loop leg
60 x 60 mm

WSLQ55
Square leg
55 x 55 mm

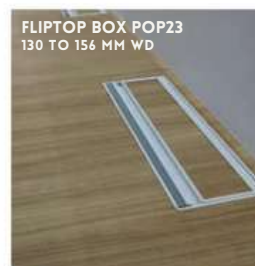

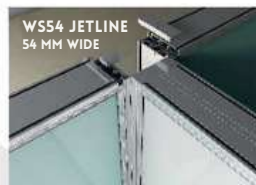

- Completely Aluminium
- Versatile, Strong & sturdy
- Modular knock-down
- Modifiable on site
- Beams act as raceways

Dual colour due to compound construction of legs and beams can add finesse and fine detailing

Work station Partitions

Unique design with table top finish embedded in lid

Fliptop Box

Steel Doors

Steel Flush Doors

- **Material:** Galvanized Steel
- **Thickness:** 1.0,0.8mm / 1.2,0.8mm / 1.5,0.8mm, / 1.5,1.2mm (Frame & Shutter) as per choice
- **Frame Profile:** 100 x 57, 125 x 57, 143 x 57mm
- **Infill materials:** Honeycomb
- **Shutter Thickness:** 46mm + / - 2
- **Door Hardware:** Hinges, Mortise sash lock with lever handle, Dead lock, Panic exit devices & Trims, Door closer, Pull Handles, etc.
- **Vision Glass:** 6mm thick

Fire Rated Steel Doors

- **Material:** Galvanized Steel
- **Thickness:** 1.5mm (frame), 1.2mm (shutter)

- **Shutter Thickness:** 46mm + / - 2
- **Door Hardware:** Hinges, Mortise sash lock with lever handle, Dead lock, Panic exit devices & Trim ,Door closer, Pull Handles, etc.
- **Vision Glass :** 6mm thick

SHAFT DOORS

- **Material:** Galvanized Steel
- **Thickness:** 1.2mm (frame), 0.8mm (shutter)
- **Frame Profile:** 100 x 57, 143 x 57mm
- **Infill material :** Honeycomb
- **Shutter Thickness:** 46mm + / - 2
- **Door Hardware:** Hinges, Shaft Lock, Concealed Handle, etc.
- **Vision Glass:** 6 mm thick

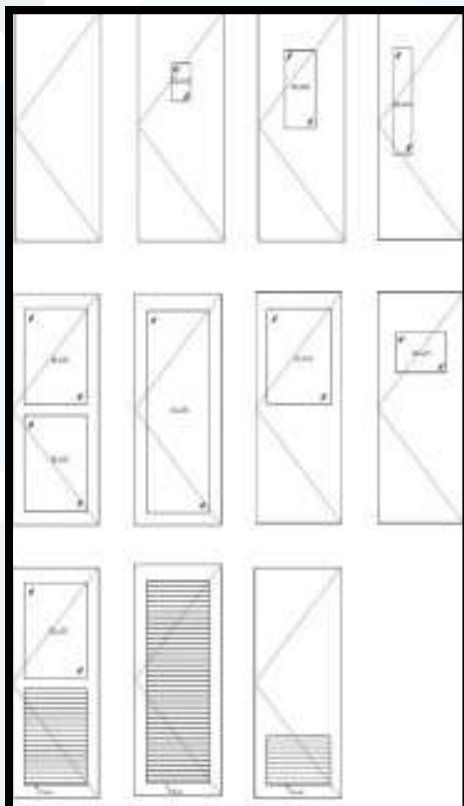

Steel Doors

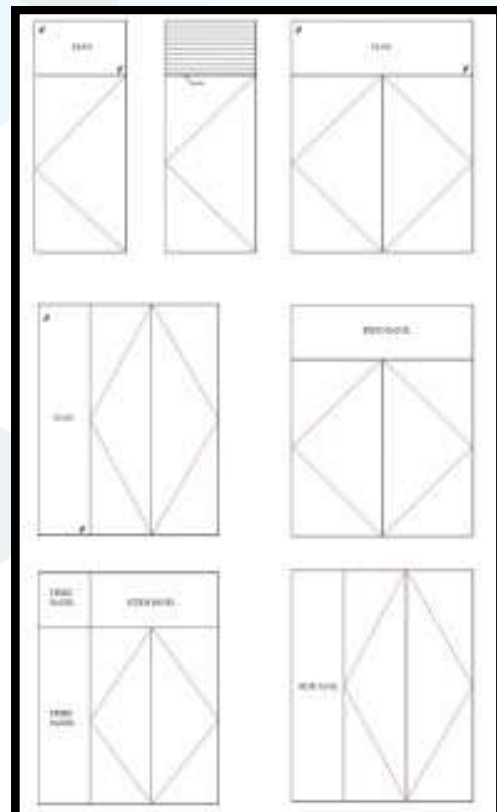

FHC DOORS (FIRE HOSE CABINET)

- **Material :** Galvanized Steel, Mild Steel
- **Thickness:** 1 mm
- **Frame Profile:** 150 x 25mm
- **Infill material :** Steel stiffened
- **Shutter Thickness:** Single Skin
- **Door Hardware:** Pivot Hinges, Shaft Lock, Shaft Handle, etc.
- **Vision Glass:** 4 to 6mm thick

Door Elevation designs

Door with partition designs

Internal Doors

ABS Doors

Door Frames :

Light weight and rigid properties of Foamed PVC make it an ideal material for producing large, flat panels with a smooth surface finish. It is resistant to water and chemicals, has good insulation properties and dimensional stability.

Door Shutter : 38 mm thick

The following constitute the Door shutter

Oxidized Purple PVC: 35 x 35 mm

- Moisture / Chemical resistant
- Good screw holding capacity
- Used in hinge fixing / hardware fixing in the shutter

ABS Sheet: 1.4 mm thick on both sides

- Cold pressed with double adhesive to increase Bond Holding Capacity

Laminated Veneer Lumber: 35 x 35 mm

- LVL is typically stronger and more dimensionally stable than solid lumber of the same size and weight, making it ideal for use in door frame for hinge fixing.

Honey Comb:

High Craft Paper: 140 GSM / Shell Size 10mm

The honey comb structure is a highly effective structural design that offers excellent strength and stiffness while minimizing weight

Advantages of ABS doors

- Energy Absorption
- Minimize damage during impact
- Excellent thermal insulation
- Good Sound Absorption
- Good Dimensional Stability

Internal Doors

uPVC Designer Doors

Unlike the normal PVC doors available in the market, our Designer doors are manufactured from UPVC profiles.

Our well-designed profile combinations give the customer options to choose from multiple configurations. The fusion welding of corner joints enables better sealing and maintains the overall strength of the door frames.

The handles, hinges and tower bolts provided along with the doors come with long self life. These doors can be used as Internal doors (Rooms / Bathrooms) in both residential and commercial applications

INSECT SCREENS & BALCONY SCREENS

VELCRO FIT

Velcro Fit is the most commonly prevalent type of mosquito screen fitment system. This is the most economical option available for traditional windows with a wooden frame. Stitched by two-needle machines where the threads are in a straight-line. This fitment can be used with a quality hook and loop

SPECIFICATION

Recommended Size

- Maximum (6 ft. x 6 ft.)

Mesh Type

- All fiberglass type and polyester mesh can be used

Color Option

- Black and White

CLASSIC WINDOW OPENABLE FIT

Classic Window Openable Fit offers ease and flexibility in removing the frames and remounting it back on windows. The fitment is made of a high-grade aluminum frame of 2cm breadth. This fitment is perfect to keep you protected from mosquitoes without affecting the aesthetics of your home. This has HDPE (high-density polyethylene) hinges, stoppers and handle.

SPECIFICATION

Recommended Size

- Maximum - (2 ft. x 6 ft.)

Frame Colour Options

- White, Ivory, Honey Gold, Dark Brown

Mesh Type

- 7 types of mesh can be used

INSECT SCREENS & BALCONY SCREENS

CREASE FIT DITTO

Crease Fit Ditto fitment has a unique style of operation, otherwise known as a collapsible window/door. The type of mesh used in this fitment is a pleated polyester mesh. This can be used as a single door and double door. This sliding system is best suited for large openings. The frame of this fitment system is made of heavy high-grade aluminum sections.

SPECIFICATION

Recommended Size

- Maximum (Single: 6 ft. x 10 ft.) /
(Double: 12 ft. x 10 ft.)

Mesh Type

- Pleated polyester mesh

Frame Color Options:

- White, Ivory, Honey Gold, Dark Brown

GLOSSY ROLL FIT

Our most stylish and innovative product fitment. Glossy Roll Fit smoothly rolls up and disappears into an aluminum section when opened and could be pulled down with ease and locked at the bottom whenever mosquito protection is required. This system employs the braking technology that helps the mesh roll up and down at a slow pace when retracted and opened. As an additional feature, it also employs a self-cleaning mechanism that cleans the mesh and the rollers every time the mesh is rolled up and down. This prevents dust and debris from collecting and interfering with its functionality.

SPECIFICATION

Recommended Size

- Maximum - (5 ft. x 5 ft.)

Mesh Type

- Elite fiberglass

Frame Colour Options

- White, Ivory, Honey Gold, Dark Brown

INSECT SCREENS & BALCONY SCREENS

ACE DOOR FIT

Ace Door Fit is a premium door fitment and is aesthetically well built with simplicity and functionality. It has two grooves, one for mesh and the other for magnet strip and weather strip. As an added feature the door is provided with a 5" thick middle plate and kick plate to prevent the mesh from coming loose from the fitment when pushed. All accessories are made of graded high-quality aluminum.

SPECIFICATION

Recommended Size

- Maximum (3.5 ft. x 8 ft.)

Mesh Type

- A combination of various types of mesh can be used

Frame Color Options

- White, Ivory, Honey Gold, Dark Brown

CREASE FIT BARRIER-FREE FITMENT

Crease Fit Barrier-free is a great solution for huge openings. This barrier-free fitment rolls on a thin plastic strip that hardly obstructs the movement of people. An advanced fitment option for premium homes and interiors, it adds sophistication to the atmosphere. It effectively stops mosquitoes or insects into the living area.

CERTIFICATIONS / FEATURES FOR BOTH BALCONY AND INSECT SCREENS

MICROBAN

Lifetime protection from bacteria and fungus

GREEN GUARD GOLD

No harmful odor and emission for lifetime

LEAD FREE

No lead is been used in any of the Phifer screens

FLAME RETARDANT

As per National building codes, all the Phifer screens are flame retardant and will not spread the fire

ENERGY SAVING - This is achieved in two ways

Saves wind energy - allows excellent airflow

Saves light energy - the outward light tends to be excellent as Phifer screens are almost invisible
